

Meeting invitations from the Fractal Economy Cooperative

Why has Chrysalis School Joined the Fractal Economy?

To answer this question and find out how our school can strengthen itself economically, you are invited to two information sharing events.

Chrysalis School has registered as a gift recipient not-for-profit member of the Fractal Economy Cooperative. This is a unique grassroots economic project designed, amongst other things, to raise funds for NFPs like Chrysalis. The funds are raised through individual and business members of the Cooperative buying from other members. Parents, teachers, staff, and supporters of the school are therefore encouraged to join up as members of the Coop, advertise their goods and services for sale within the Coop, and buy preferentially from other Coop members. As members they vote on how they would like to see the gift money allocated. More information is available at <https://fractaleconomy.coop/>

The Cooperative is having a general meeting on Friday 8th April in Bellingden at The Stables [behind the ambulance station, Church St, Bellingden] starting at 4.30 pm. You are invited to attend as a member or just to learn more about how the Cooperative works. Gavin Tang, a founding director of the Coop, will be giving a short (20 mins) talk on the growing financial crisis globally and how communities can prepare for it. Members and friends are welcome to attend.

Further, some residents of Bellingden and surrounds have invited Gavin Tang to talk and lead discussions on Saturday 9th April (between 10am and 2pm) about the spiritual, political, and economic events of our time. Rudolf Steiner spoke of a more holistic way to structure the economy to avoid future economic disharmony. The title of these two talks is 'The threefolding of society and the threefolding of the economy'.

These talks will be held in a private home in Bellingden and will include a lunch which is bring-a-plate-to-share. Some familiarity with the spiritual science of Rudolf Steiner is assumed in this presentation. Please contact Kevin Turner at kevinwrightturner@gmail.com or 66550840 if you wish to attend.
