

MATTERS OF THE MOMENT

COURSE OF 12 WORKSHOPS ON THE GREAT RESET

DANCE OF THE MACROCOSM OF WORLD EVENTS AND THE MICROCOSM OF PERSONAL BIOGRAPHY

“ Today we stand immediately at the threshold of a time when good must consciously come to terms with evil.” RS

“ Only when you consider the many spiritual individualities working against each other or with each other, all within the wash of the wave of events, so as to speak, only then will you understand things correctly “ (Steiner Electronic Double Page 92)

We live in very interesting times with accelerating technocracy, speeding up of time, unprecedented levels of corruption, ecological destruction and social chaos. Steiner indicated that in this epoch (1413 -3573) a confrontation is taking place in relation to humanity's understanding of evil. Human beings need to fully consciously struggle with the evil emerging in this epoch as the essential task in this chapter of human evolution. World events and our own actions are influenced by spiritual individualities that are in the first instance independent and contradictory to one another. To consciously meet ourselves and the world in this epoch we need to be able to unravel these contradictions in a precise and concrete way. This is a difficult and challenging task and there is a tremendous resistance to it. We are not a unity, nor is this world - both are a battleground and it is crucial to get clear on how this battle is being waged around us and within us.

Each workshop consists of a presentation on the relevant and topical matters of the moment issues in the morning and then in the afternoon a detailed personal examination of how these issues have impacted your biography to allow the understanding of your personal response in relation to these issues. I believe this reflection of inner and outer is essential for conscious awakening in our time - the adversaries are here for human freedom but without clarity we are trapped in circles. I am offering this work as I am convinced that a deeper understanding of what Steiner brought in relation to the spiritual understanding of evil in our times is necessary for an authentic grasp of the spiritual world and also our often conflicted inner responses. [It is also essential for developing our personal body/ soul/ spirit survival kit in the accelerating and escalating social changes and also knowing the answer to what can I do?](#)

1.
